## DRILLING

### Drills

Standard-drills, Undercut-drills, Slot drills, diameters = 0,05 mm (50 µm)

### Routers

Diamond patterned router, Chip breaker, Two flute endmill, V-groove cutter, scoring blades

### Entry

Entry-material for different kind of applications

### Backup

Backup material for different kinds of applications

### Auxiliaries

Auxiliaries for Drilling and Routing Applications: Tooling plates, Drill Check

#### Tooling Plates

- Description: Paper phenolic with white melamine finished ideal for routing.
- Specification: Thickness: 6 -10 or 12 mm

#### Drill Check

- Description: A dimensionally stable translucent green plastic sheet designed for visually checking drilled holes locations in the printed circuit boards.
- Specification: Green 24"x48"
- Packs of 50 sheets
